Fundraising Goal:

Education Support

The Education Grant Programme aims to make good education more accessible for children from underprivileged backgrounds while at the same time looking for ways to improve the quality of education provided in more deprived areas.

The programme works in a number of ways, including subsidising school fees for students who are unable to afford them and sponsoring and training teachers at our partner schools. These grants, in conjunction with help in teaching from our volunteers, enable an affordable quality education for more children from underprivileged background. The Foundation also considers projects to improve the existing infrastructure and facilities at our partner schools with the aim of improving the quality of education that children receive.

The FutureSense Foundation works towards development of local communities. We believe in the powerful combination of community based grant programmes and the work of volunteers present on the ground to support the schools in need. This enables us to act quickly, with the support and help of local people, on grassroots projects that make a huge difference to people's lives.
